

SILEX - USB Device server for communication with COMET dataloggers via Ethernet or Wi-Fi

☐☐: Silex

The Silex DS-xxx is designed to easily connect and share USB devices over a network. It allows flexibility to place the USB device anywhere on the network instead of needing to be attached directly to the computer, and multiple users can access the USB device.

It can be used for connecting all COMET dataloggers to the Ethernet (Silex-DS510) or to Wi-Fi (Silex-DS520). Easily Connect and Share Virtually Any COMET Datalogger on a Network.

Silex completely replaces the LAN Adapter (LP005)
