

Temperature data logger for four external Pt1000 probes - kopie

□□: U0141T

The Datalogger is designed to record temperature for four external Pt1000 probes. In case of exceeded set limits, SMS and JSON messages can be sent via GPRS data connection. It is possible to set the regular sending of JSON messages to COMET Database, the sending interval is adjustable.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via USB-C.

The device **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.
